ExPRO

Expiring Policy Roll-Over is an entirely new product to improve non-life portfolios for European insurers. It eliminates expired policies within active underwriting portfolios. ExPRO is a powerful instrument for capital optimisation, as it facilitates the release of capital and resources almost immediately, providing full economic, legal and operational finality. ExPRO operates as a regulatory-friendly, straightforward, recurring portfolio transfer with a unique forward-looking and pricing element through advanced analytics. Munich Re is our strategic partner, taking on a major part of the risks assumed by way of reinsurance. Meet us now: www.gossmann-cie.com
