CellPRO

CellPRO offers cell-based, segregated and managed insurance structures. Via our Protected Cell Company and digital infrastructure, we enable third-party insurance companies, managers and intermediaries to create and support their customised business cases and or take advantage of the insurance ecosystem. Our cell-based insurance structures facilitate the ring-fencing of risks, by managing them in segregated entities (cells) and enabling the sharing of economic interest. CellPRO can be used for both legacy and active portfolios, by means of fronting, incubating new risks or acting as a captive solution. Meet us now: www.gossmann-cie.com
